**MyIntelli Guest** or **MIG**, is a powerful web developed tool that will allow you manage and control the reception of visitors to different areas of your business or organization, giving you the possibility of constant monitoring in real time from everywhere in the world logging in from your cell phone, tablet or computer.

# MyIntelli

## MyIntelli Guest

- ✓ Administration and digital registration utilizing photo capture and biometric information of the visitor and the person being visited.
- ✓ Management of a black list. In the event of an incident with a visitor, they may be placed on a black list. This will prevent a visitor from leaving or reentering the company or organization in the future.
- ✓ Extensive real time monitoring and control of visitors who are in the organization
- ✓ Integration with third-party software and with a wide range of devices such as: biometrics, turnstiles and lockers (among others).
- ✓ It has an effective module for the management and control of events.

**The solution which streamlines and modernizes the reception of your visitors and keeps your space safe.**

### Registration process:

- ✓ Visitor registration begins when making a scheduled visit or from the moment they arrive at the organization.
- ✓ Your basic data is taken manually entering it into the system or using a barcode reader which scans the visitor's identity card code.
- ✓ The fingerprint will be registered with a USB biometric reader and a photograph of the visitor is taken if a camera is connected to the computer.
- ✓ If the visitor has been scheduled, they will have the option of using the self-registration kiosk to validate their visit.
- ✓ Photography and biometric data will be captured.
- ✓ The authorization is sent to the access devices where it will be validated by fingerprint, ID badge, facial recognition, iris, vein or palm of the hand, which will allow access to the organization.

The solution that streamlines and modernizes the reception of your visitors and keeps your space safe.

**MIG**, allows integration with a wide variety of devices for visitor control, such as: SekureID and ZkTeco. The software analyzes the information and reports collected by the devices which are connected to the platform.

Compatible with a wide range of biometric devices.

# MyIntelli

It has an effective module for managing and controlling events.

## MyIntelli Guest

**MIG**, allows you to configure and monitor events and incidents related to the control of visitors and devices. For example:

- ✓ Receive notifications about the status change of unexpected or scheduled visits.
- ✓ Sending notifications when creating new visits.
- ✓ Sending notifications when activating or deactivating workstations or computers where the visitor registration process is being carried out.
- ✓ Sign-in notifications.

These notifications will be received by the following media:

- ✓ Directly in the system
- ✓ On your mobile phone through text messages
- ✓ By Email
